

Role: Graduate Digital Design Engineer

Reporting to: CTO

Based: Plymouth, UK

In-Chip Monitoring
Subsystem Solutions

About the Company:

Moortec Semiconductor is no ordinary company. We are looking for talented and enthusiastic self-starters with inquiring minds who are willing to support our cutting edge work in semiconductor IP design. We licence our in-chip monitoring products to a range of Blue Chip companies around the globe. From modest beginnings in 2005, we have now established ourselves as market-leaders and a forward-thinking company with a truly global reach.

Our working environment is welcoming and friendly and you'll be surrounded by some of the brightest minds in the industry and world-class Engineers. For some of our roles it doesn't matter if you're not from an engineering background but it's always important you can share our company values of; **Expertise, Teamwork, Integrity and Balance.**

We can offer employees a challenging and fulfilling career path, where you will be encouraged to let your ideas flourish at every level and be supported in your development to fulfil your potential.

We offer an excellent salary and benefits package, flexible working arrangements, regular social events and modern offices in one of the most beautiful areas of the UK. We're close to outstanding beaches and exceptional coastline, rolling hills and lush green countryside, the dramatic moors and all the entertainment, shops and restaurants offered by Plymouth; Britain's Ocean City.

About The Role:

Working as part of a small but expanding team, you will be responsible for the design, verification and testing of the digital and mixed signal solutions for which Moortec Semiconductor has an industry leading reputation.

Responsibilities and Duties:

- Draft and detail, digital block design specifications.
- Design and simulate circuits to agreed requirement specifications.
- Create supporting design documents such as design reports and user documentation.
- Liaise with other technical staff to facilitate best possible engineering solutions.
- Provide support in answering customer questions.

Other duties as may be required.

Qualifications, Skills & Experience:

- Bachelors, Masters, PhD or equivalent qualification in Electronic Engineering or a related field (2:1 or above)
- A genuine interest and understanding of digital design techniques and practices
- Experience of functional verification and related topics - code coverage, functional coverage, etc.
- Previous project experience in RTL coding using preferably SystemVerilog or Verilog
- Passion for developing expertise
- Strong organisational and problem solving skills
- Great attention to detail and ability to use own initiative when working under pressure
- Excellent team working
- Flexibility and adaptability
- An understanding of ASIC digital physical implementation flow, (synthesis, place and route, STA) (Desirable)
- Programming and scripting skills in C, python, tcl, bash (Desirable)

Salary & Benefits:

- Competitive salary
- Training, mentoring and support with career development
- Regular pay reviews and company bonus scheme
- 28 days holiday + bank holidays
- Company pension scheme
- Life assurance cover
- HealthShield cash plan
- Gym Membership
- Access to company share scheme
